This application illustrates how to create the image and imageItem using Image and ImageItem class respectively.

J2ME Image Item Example

[<--Prior](#) [Index](#) [Next-->](#)

This application illustrates how to create the image and imageItem using Image and ImageItem class respectively. In this example we are going to create an image using Image Class and imageItem using

ImageItem class. In the following source code you can see it:

```
Image image = Image.createImage("/sunrise.png");

ImageItem = new ImageItem("This is the IMAGE_ITEM Application",
image, ImageItem.LAYOUT_DEFAULT, "image");
```

The Application is as follows:

ImageItemMIDlet.java

```
import javax.microedition.lcdui.*;
import javax.microedition.midlet.*;

public class ImageItemMIDlet extends MIDlet implements CommandListener{
    private Command exit;
    private ImageItem imageItem;
    private Image image;
    private Display display;
    private Form form;

    public ImageItemMIDlet(){
        try{
            image = Image.createImage("/sunrise.png");
        } catch (Exception e){ }
        imageItem = new ImageItem("This is the IMAGE_ITEM Application",
            image, ImageItem.LAYOUT_DEFAULT, "image");
    }

    public void startApp(){
        form = new Form("ImageItem Example");
        display = Display.getDisplay(this);
        exit = new Command("Exit", Command.EXIT, 1);
        form.append(imageItem);
        form.addCommand(exit);
        form.setCommandListener(this);
    }
}
